TEU Conservices leases, repairs and maintains sea-going containers at Limassol port. The company has some of the most modern facilities in the eastern Mediterranean for the repair and refurbishment of containers, approved by L.R.S. The company is based in Limassol, Cyprus and operates from owned premises comprising a total area of 34ha of which 3,600m² forms a covered workshop and a 28,000m² area is used for repair and storage. Since 1983 the company also exploits the manufacturing of pre-fabricated mobile units made out of insulated and/or fireproof panels. Prefabricated mobile units come in standard and/or individual sizes. Ideally used as houses, offices, school rooms, workshops, GSM units, workshops.
This company owned and operated the FIRST desalination BOOT contract in Cyprus for 9 years, the DHEKELIA DESALINATION PLANT, 1997–2006. The plant, which came as a result of the island’s continuously increasing demands for potable water, was a USD 42 million 10-year FIRST B.O.O.T. contract (Build-Own-Operate-Transfer, back to the government of Cyprus) designed to produce 40,000m3 of potable water per day. The plant was inaugurated in April 1997 and utilized the Reverse Osmosis (RO) process to remove dissolved solids from raw seawater and produce potable water in accordance with EU Drinking Water Standards using the DUPONT filament membranes. In 2006 the company won the new international 20-year BOOT tender and signed a contract with the Government of Cyprus for the construction of a new sea water desalination plant with a capacity of 60,000 m3/day. Under this contract the company will operate the Dhekelia plant until the year 2027.
ENGINEERING and MANUFACTURE OF SEA & BRACKISH WATER DESALINATION UNITS and WATER TREATMENT SYSTEMS

Established in 1985, OSMO SISTEMI S.r.l., based in Italy, offers the services of a competent engineering team with extensive experience in the design, manufacture, installation, commissioning, start up, operation and maintenance of reverse osmosis and water treatment systems.
